

HOUSE M

You would usually find a House Mouse in fields or hedges. But when cold weather

conditions.

A baby stoat is called a kit

HUNTING:
When hunting rabbits the stoat picks one and follows it till it kills the rabbit. They also eat mice, pigeons and many other birds. Stoats will hunt above and under ground.

From 35 to 140 mm from nose to tip of tail

APPEARANCE:
Like stoats coat is reddish brown. And its under side is creamy white. They are very powerful but their small skulls & teeth would be strong and useful. Their teeth are extremely sharp they are very agile. They often use spines to defend their.

Male
Stoats are better

MOUSE
